

Traveling back to Hiroshima in 1945 – the Aftermath of the Atomic Bomb

This is an official program of the C7 Summit 2023

In this program, a navigator will introduce two pieces of valuable documents. A newspaper issued on the assumption that they are reporting from Hiroshima on the day the A-bomb was dropped, and a documentary film which had been shot in 1945, showing the aftermath of the Atomic bomb in Hiroshima. The completed film has long been confiscated by the US, but it came back to Japan in a viewable version after 65 years of making.

Both of the documents are very valuable, and we got the permission to introduce them to the global community with a tremendous support of the nuclear disarmament activists.

Hosted by: Nuclear Disarmament Working Group, C7

Supported by: Peace Platform

Newspaper provided by: Japan Federation of Newspaper Workers' Unions

Film provided by: Nichiei Eizo Ltd.

Don't miss this special occasion, as the program will only be available for 48 hours, during the C7 Summit period on April 13-14 (JST).
